

2012 ANNUAL EMISSIONS INVENTORY REPORT

In the late part of December you probably received a letter from South Coast Air Quality Management District (SCAQMD) requiring that your facility file an Annual Emissions Inventory Report (AEIR). The report covering the 2012 reporting period, which includes operations in Calendar Year 2012 (January 1 through December 31), is due on Tuesday, March 5, 2013.

The report requires all facilities to include emissions of criteria pollutants and toxic air contaminants from its permitted and non-permitted sources. Associates Environmental staff has been preparing Annual Emissions Inventory Reports for more than 15 years and we are ready to assist you if you lack the time to deal with this report and the on-line submission process.

Certain facilities may also be required to report Greenhouse Gas (GHG) emissions to ARB and/or EPA. Please be aware that significant changes to California's Greenhouse Gas Mandatory Reporting Regulation became effective during 2012. Associates Environmental has ARB-accredited Greenhouse Gas Verifiers on staff to provide you with the most up to date information on how the federal and California GHG reporting regulations may impact your facility and reporting requirements.

If we can help you with your Annual Emissions Inventory Report, or if you would simply like to discuss the services Associates Environmental offers, please call us or send us an e-mail. Our e-mail addresses are as follows:

Ricardo Flores: rflores@associatesenvironmental.com

Drew Delaney: ddelaney@associatesenvironmental.com
