# CALIFORNIA'S NEW CLEAN TRUCK CHECK

## A HEADS UP FROM ASSOCIATES ENVIRONMENTAL

### CARB's Clean Truck Check Reporting Begins October 1 and Ends December 31, 2023!

Did you know that the California Air Resources Board's (CARB) is retiring the Periodic Smoke Inspection Program (PSIP)? CARB's NEW Clean Truck Check, formerly known as the Heavy-Duty Inspections and Maintenance Program (HD I/M), replaces the PSIP with a program that is more analogous to the Smog Check program for passenger vehicles. The Clean Truck Check starts with fleet reporting from October 1 to December 31, 2023; every non-gasoline (diesel and other alternative fuels) vehicle with GVWR greater than 14,000 lbs., is required to be reported to the program. CARB assesses a fee of \$30 per vehicle to complete this initial reporting and annually thereafter. Failure to comply may result in citations and DMV blocking vehicle registrations. ASSOCIATES ENVIRONMENTAL is available to assist in completing the initial reporting.

More Clean Truck Check requirements are also coming. From July 2024 to December 2024 each vehicle must go through its first Clean Truck Check. Each vehicle undergoes a Clean Truck Check prior to registration renewal and prior to six months after its last registration renewal. In 2025, each vehicle will begin to go through TWO Clean Truck Checks per year.

More guidance on the Clean Truck Check can be found below:

## CLEAN TRUCK CHECK

If you have any questions about what the Clean Truck Check may mean for your fleet, please feel free to reach out to ASSOCIATES ENVIRONMENTAL. The contact information for our consultants appears below.
